PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 7+ years of commercial experience delivering scalable, high-performance e-commerce web applications. Specialist in React.js, JavaScript (ES6+), and CSS3/SASS, with a strong history of architecting reusable component libraries, integrating RESTful APIs, and independently managing end-to-end frontend development of complex e-commerce platforms. Proven ability to reduce technical debt, improve application performance, and deliver responsive, cross-browser-compatible solutions within Agile environments. Actively seeking a UK-based Frontend Developer or React Developer role.

CORE TECHNICAL SKILLS

- React.js
- JavaScript ES6+
- CSS3, SASS/SCSS
- Tailwind CSS & Bootstrap – Utility-first Styling
- Next.js
- RESTful API Integration
- E-Commerce UI Development – PDP, Cart, Checkout Flows
- Performance Optimization – Lazy Loading, Code Splitting
- Responsive & Mobile-First Design
- Cross-Browser Compatibility (Chrome, Firefox, Safari, Edge)
- Git & GitHub
- Basic SEO Principles – Semantic HTML, Meta Tags, Page Performance

KEY ACHIEVEMENTS

- Delivered a full product search for a live e-commerce platform, reducing search response time and significantly improving user experience and conversion metrics.
- Independently managed frontend development of multiple e-commerce web applications from design handoff through to production deployment.
- Refactored legacy codebases into modular, reusable React component libraries, cutting technical debt and reducing future development time by an estimated 30%.
- Implemented advanced REST API integrations enabling real-time product listings, dynamic pricing, and seamless cart/checkout functionality.
- Achieved consistent cross-browser compatibility across Chrome, Firefox, Safari, and Edge, supporting both desktop and mobile-first responsive layouts.
- Applied SEO fundamentals including semantic markup, optimized page structure, and performance improvements to enhance search visibility and user experience.

PROFESSIONAL EXPERIENCE

Front End Developer – Support Team | Powerweave Software Services Pvt. Ltd. | June 2024 – Present | Remote / UK

- Developed and maintained scalable, reusable React.js UI components for enterprise-grade e-commerce platforms, ensuring consistency across product, cart, and checkout journeys.
- Engineered an advanced product search and filter feature using React state management and REST API integration, improving search speed and on-site user experience.

- Resolved critical production defects and performance bottlenecks, improving application stability and reducing incident resolution time.
- Led refactoring of legacy JavaScript and CSS code into modular React components, reducing technical debt and improving maintainability across the codebase.
- Ensured pixel-perfect, responsive layouts and cross-browser compatibility across all major browsers and device types.
- Collaborated closely with backend engineers and QA teams within Agile sprints to deliver stable, optimised releases on schedule.
- Applied performance best practices including code splitting, lazy loading, and efficient API data handling to improve Core Web Vitals scores.

Associate Web Developer | Powerweave Software Services Pvt. Ltd. | October 2021 – May 2024
/ India

- Built interactive, responsive e-commerce web applications using React.js, JavaScript (ES6+), HTML5, and CSS3/SASS from scratch and from existing designs.
- Translated UI/UX wireframes and Figma designs into reusable, production ready React components with clean, maintainable code.
- Implemented dynamic features including product filtering, real-time cart updates, and form validation using React Hooks and component state.
- Integrated multiple RESTful APIs for dynamic product data, user authentication, and order management, handling loading states, error boundaries, and data normalisation.
- Maintained and improved responsiveness across mobile, tablet, and desktop viewports using mobile-first CSS and media queries.
- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives, collaborating with designers and backend developers.

Associate Software Engineer | OMNION Premedia Pvt. Ltd. | August 2018 – September 2021
India

- Supported frontend development initiatives, enhancing UI functionality and visual consistency across multiple web application projects.
- Assisted with debugging, performance optimisation, and issue resolution to improve user experience and code quality.
- Contributed to improving code standards, cross-browser compatibility, and overall application usability.

TECHNICAL COMPETENCIES IN CONTEXT

React.js & JavaScript: Deep, firsthand expertise building component-driven e-commerce UIs with React Hooks, Context API, and custom hooks. Proficient in ES6+ features including destructuring, spread operators, optional chaining, and asynchronous patterns (async/await, Promises).

CSS3 / SASS: Strong command of SASS/SCSS including variables, mixins, nesting, and partials. Experienced with Tailwind CSS utility classes and Bootstrap grid systems for rapid, responsive UI development.

REST API Integration: Proven experience integrating RESTful APIs using Fetch and Axios, including handling authentication headers, error states, loading skeletons, and data transformation for complex e-commerce data models (products, inventory, orders, users).

E-Commerce Platforms: Independently managed frontend development of end-to-end e-commerce solutions including product listing pages (PLP), product detail pages (PDP), search & filter, shopping cart, and checkout flows.

EDUCATION

M.Tech – Microelectronics and Control Systems - Visvesvaraya Technological University, India

B.Tech – Electronics and Communication Engineering - Visvesvaraya Technological University, India

CERTIFICATIONS

- React.js Certification – Advanced React Development
- Next.js Certification – Server-Side Rendering & Static Site Generation
